

Gate 2 — Classification Diagnostic Engine				Gate 3b — Bivariate Spatial Cross-Correlation				
Variable	Diagnosis	Prescribed Method	Status	Statistic	Value	p-value	Threshold	Decision
Tree Canopy Loss	heavy right skew	log-transform + Jenks	PREScribed	Bivariate Moran's I _{xy}	+0.3262	0.0050	I _{xy} > 0.15	✓ PASS
Asthma Hosp. Rate	heavy right skew	log-transform + Jenks	PREScribed	Spearman's ρ	+0.9471	0.00e+00	ρ > 0.20	✓ PASS
					✓ Overall gate decision: APPROVE			

LLM proposed: *jenks (naïve)*. Gate 2 overrides both $\rightarrow$ log-transform first, then Jenks on residuals.

199 permutations under H_0 : no spatial cross-association. Pseudo p -value = $(M+1)/(R+1)$. Bivariate choropleth unlocked.
